

# Waste treatment plants (WTPs)

REYM is an industrial service provider. We support our customers in the field of industrial cleaning, transport and waste management, always acting from our mission 'Industrial Services our concern' and driven by our core values.

With the help of our WTPs in Rotterdam, Beverwijk, Sittard and Veendam, we are able to offer our customers support at the highest level. At the WTPs, oil, water and solids are separated from each other. The purified water is discharged via the sewage system in the region. Other waste materials are sent to specialistic companies for further processing.

Every wasteflow is different and needs an unique treatment. We always find the most efficient solution for your waste.
