

Industrial services for the oil and gas industry

REYM is an industrial service provider. We support our customers in the field of industrial cleaning, transport and waste management, always acting from our mission 'Industrial Services our concern' and driven by our core values.

REYM has over 60 years of experience in the oil and gas industry and more than 750 employees, who deploy their knowledge, skills and experience to offer REYM's clients the best and most efficient service and technologies available possible. Our employees form the backbone of REYM, which is why REYM focuses on personal safety and competence level of its employees.

REYM can offer its clients an integrated approach on industrial cleaning, transport and waste management. REYM takes responsibility for the collection, removing, cleaning, transporting, treatment, recycling, processing and storing of waste for all waste streams. REYM provides clients with one point of contact for all their waste related activities. REYM also uses this concept to realise costs reduction on all cleaning and waste related activities.

For all requests made by client, REYM mobilises its staff and materials 24 hours a day and 7 days a week to meet the cleaning and waste management requirements.

The well-trained and experienced staff can offer clients professional cleaning and waste management solutions for all waste related activities, including NORM waste (waste with an enhanced natural radioactivity) and waste contaminated by mercury.

Shutdown cleaning on production platforms:

- Vessels
- Separators
- Skimmer tanks
- Valves
- Pipework
- (Helipads) deck cleaning

Cleaning on drilling rigs:

- Mud active System
- Pit cleaning
- Well test equipment
- Dry bulk silos
- Flow lines

Supply vessel tank cleaning:

- Cleaning dry bulk tanks and drilling mud on platform supply vessels
- Automated tank cleaning

Specialties

- Decontamination of Norm/Hg contaminated materials
Chemical cleaning
- Offshore cleaning for decommissioning and abandonment of process facilities

Waste management services for onshore drilling

Locations:

- Transporting and processing drill cuttings and water-based drilling mud
- Transporting oil-based drill cuttings and drilling mud
- Transporting and processing of rainwater, contaminated water and cleaning residues
- Transporting and processing of domestic and industrial waste
- Application for permits for rainwater drainage to a local sewerage system on onshore locations.

Tank rental services

REYM has over 400 certified offshore tanks, suitable to store and transport different kinds of chemicals and waste streams. The REYM rental fleet consists of tanks with a capacity of 2.5 m³, 4.5 m³, 7 m³, 8 m³ and 20 m³ and drill cuttings containers of 3.7 m³ and 7 m³, all certified in accordance with EN 12079, DNV 2.7-1 and Lloyds.

All tanks are available for long or short-term rental periods.

Transportation

Using an extensive and modern fleet, REYM is able to safely transport dry substances, sewage sludge, fluids and hazardous waste. REYM chooses the appropriate means of transportation you need for your specific waste material. All our transportation equipment meets the highest environmental standards and the ADR and EU directives.

Central Mud Plant Emmen (CMP)

At CMP, REYM produces all types of drilling mud production fluids imaginable for the oil and gas industry.

- The total storage capacity in silos and tanks is 5000 m³.
- Thanks to its high storage capacity, CMP can immediately produce and deliver drilling fluids and production fluids to you.
- Customers can deliver liquids that are still usable after drilling to CMP for storage and reuse.
A unique opportunity!
- An experienced engineer carries out permanent quality inspections in our laboratory and can give you advise about the production of new fluids.

Waste Management

REYM can process all your waste streams from production or drilling facilities. REYM has all the required permits to store, transport and treat all waste streams from the oil and gas industry, therefore they can provide you the best and most cost-effective solutions for all your waste related activities.

NORM-contaminated sludge

REYM has been granted a permit from the Dutch government to treat of LSA/NORM-contaminated sludge.

Advice and support about waste

REYM gives its clients advise and support in the storage, transport and processing of all waste streams. REYM meets the latest legislation requirements and offers the best and most cost-effective solutions for all waste streams.

REYM maintains a certified management system in accordance with:

- Tank cleaning (KIWA)
- Safety Checklist for Contractors (VCA)
- ISO 45001
- ISO 9001
- ISO14001
- ISO22000
- FPAL Assessment Certificate

If you would like more information, please contact one of the REYM branches in your region.
