

REYM B.V.

REYM is an industrial service provider. We support our customers in the field of industrial cleaning, transport and waste management, always acting from our mission 'Industrial Services our concern' and driven by our core values.

Since its establishment in 1953, REYM B.V. has developed into a nationwide services provider specialised in industrial cleaning, transportation and waste management. In addition to our head office in Leusden, REYM has strategically distributed offices in the Netherlands: in Amsterdam, Beverwijk, Rotterdam, Sittard, Veendam, Delfzijl, Den Helder, Duiven, Akkrum and Emmen. With more than 700 employees and 350 units of equipment, REYM is one of the leading service providers in the market. REYM also provides collection and disposal of waste and takes responsibility for the collection, removing, cleaning, transporting, treatment, recycling, processing and storing of waste for all waste streams.

We specialise in industrial cleaning using the latest equipment and advanced cleaning techniques. Whether onshore, offshore or underground, such as sewer cleaning, REYM has the necessary experience to be able to adequately serve you with cleaning, transport and waste management.

REYM has over 60 years of experience in the oil and gas industry and more than 700 employees, who deploy their knowledge, skills and experience to offer REYM clients the best and most efficient service and technologies available possible. Thanks to the expertise within the organization, REYM can offer their clients one point of contact for all waste management-related questions. REYM also uses this Total Care-concept to realise costs reduction on all cleaning and waste related activities.

For all requests made by clients, REYM mobilises its staff and materials 24 hours a day and 7 days a week to meet the cleaning and waste management requirements. The well-trained and experienced staff can offer clients professional cleaning and waste management solutions for all waste related activities, including NORM waste (waste with an enhanced natural radioactivity) and waste contaminated by mercury.

Safety

Our employees are intensively trained and guided to shape our services in a safe manner. The development of safer working methods and safe equipment is also an ongoing focus of attention. REYM has a FPAL registration and maintains a certified management system in accordance with VCA Petrochemistry, ISO 9001, ISO 14001, ISO 45001 and KIWA.

SIR

The aim of the Industrial Cleaning Foundation (SIR) is to promote and regulate safe working practices in industrial cleaning. The foundation is committed to the development of new technologies and guidelines in this area. REYM attaches great importance to the safety of its employees and therefore actively participates in the SIR.

Policy

REYM's policy is aimed at continuity of service, where safety, environment and quality are absolute conditions. REYM strives for optimal working conditions for both its employees and hired third parties. Partly as a result of rapid changes in the field of information and communication technology, the environment is making ever-increasing demands on employees. REYM supports and encourages its employees in knowledge improvement and development.

Corporate Social Responsibility

In order to cause as little damage as possible to the environment, REYM has an environmental policy that stipulates that the service provision must at least comply with all the applicable laws and regulations. Furthermore, we ensure in all possible ways that our activities have the smallest possible negative impact on the environment. We try to achieve this by continuously increasing the environmental awareness of our employees and by equipping our trucks with gas scrubbers and special engines that ensure a reduction in CO2 emissions.
